New Moon at 2°Cn47'

The Dark Moon (or New Moon) is when the Moon is completely dark. This is when the Sun, Moon, and Earth line up in that order and on the same line. That is, the Moon is between the Earth and the Sun, so it appears completely dark to us, as if it disappeared.

As the Moon moves in conjunction with the Sun, rising in the morning and crosses the sky, unseen, during daylight. This means there is no Moon in the sky during the night. Thus, this is the darkest night of the month. In the countryside on a starless night, you cannot see your hand before your face. It is complete and absolute darkness, like being in a void of perception.

But, within this perceptual isolation, is mystery and wonder. This is the time when the spirit can realize the possibility of unrealized potential. On this day, the Moon moves in conjunction with the Sun, rising in the morning and crosses the sky, unseen, during daylight. Many Witches use the Dark Moon as a rest period for regeneration and meditation.

Color: Purple

Have a wonderful week!

Be blessed,
